

Slideshow DVD (standard)

Positioning Statement

Slideshow DVD (standard) is a slide show presentation of your photographs placed on a DVD for you to watch from the comfort of your own home. You may place up to 100 photographs and select the music of your choice. With Slideshow DVD, you can choose from the following selection of musical themes:

- Pleasant Moods
- Jazz
- Rock
- Soft Pop

Product Concept

With the rapid growth in digital photography, comes rapid growth in supporting products. Slideshow DVD is a product intended to capitalize on your digital photos and see them reach their fullest potential. With our DVD products, you have a new way to experience unlimited possibilities. You can now present your photographs in a different and exciting way that everyone will love.

Target Audience

This product appeals to individuals in the aging market (55+). With this product, the images are large, filling the screen, and have few distractions. The Slideshow DVD is simplistic, yet elegant, appealing primarily to women. However, this product is intended for anyone with photos.

Key Features and Benefits

Slideshow DVD provides an entertaining outlet for presenting photos that stir human emotions. In this format, you can easily share your memories with friends and family and preserve your photos for future generations. These DVDs come as customized presentations that feature your own title and music. This is your movie of your photos in a brand new style.

Frequently Asked Question

How many photographs can I use to make my Slideshow DVD?

You may use any number up to 100 photos.

Can I select my own music?

You may choose only from the options we provide. Unfortunately, copyright laws prohibit using any musical selection without synchronization rights.

Will there ever be more music options?

Yes. We will constantly be adding more music options.

Why are there black lines on both sides of some of my pictures?

If your photographs are vertical images, we will center the image on the screen. This often leaves black lines down both sides of the screen.
